Experienced manager and community advocate with strong organizational and people skills. Volunteer work focused on uplifting the non-profit sector provided opportunities to develop websites and mobile applications and discover a passion for technology. Looking to join an organization where I can leverage my people centric views and technical skills to create solutions that help meet the needs of our end-users.

Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

Annotation Station: Capstone Project

Full-stack application. Timestamp YouTube videos with notes which can be organized into Collections so that resources can be easily found for later use. Collections can then be shared with the apps community of users.

BookStack: Book Trading Application

Built a marketplace for books using Java, MySQL, JavaScript, the google books API that included different user types

Movies We Love: Movie Listing Application

Used JavaScript and ajax requests to allow users to search, add, and delete movie information by name and category

Coffee Project: Mock Company Website

Created a JavaScript application to allow users to search, add, and delete coffee roasts, gave
